

Psychosynthesis South Pacific Trust

Certificate in Psychosynthesis Integration

Following on from the Essentials of Psychosynthesis, this program is designed to help participants review their own life journey through the lens of Psychosynthesis. Engagements in individual and collective processes allows each person their unique perspective and insights and provides the opportunity to explore how best this learning may be applied within the context of personal and group mind.

Course Duration

9 monthly reflective weekends through the year, ending in a 4-day residential retreat. Each weekend of this powerful year of personal development builds on the others to create a coherent body of experiential learnings, which can be integrated into daily life and relationships.

Integration is further enhanced through mid-month tutorials and short, written assignments. Participants are also expected to work with a Psychosynthesis practitioner to deepen their awareness of their own psychodynamic processes and their understanding and confidence with the work.

Psychosynthesis South Pacific Trust is a new initiative formed to continue a professional programme of training for anyone interested in including the craft of Psychosynthesis as part of their personal or professional development, to meet the needs of a changing world and the call for transformation.

The Certificate in Psychosynthesis Integration is the initial, personal development stage of the proposed five-year Diploma in Psychosynthesis Psychotherapy. As of November 2018, PBANZ has accepted the Psychosynthesis South Pacific Trust's (PSPT) proposal for a Diploma in Psychosynthesis Psychotherapy under their grand-parenting arrangement.

The Certificate in Psychosynthesis Integration can also be taken as a stand-alone, psychologically informed foundational course in Psychosynthesis for those who do not wish to pursue the full clinical training.
